Shriram Properties Fosters Climate Consciousness Plants 1000 Saplings

As part of Shriram Properties Ltd's (SPL) dedication to preserving the environment and contributing positively to the planet, SPL has successfully planted approximately 1000 tree saplings across all premises of Shriram Properties Ltd.

This tree plantation drive not only enhances the aesthetic appeal of the surroundings but also plays a crucial role in combating climate change and promoting a greener future for generations to come. Also, recognising the importance of engaging each member of the Shriram family and the positive role that each one can play, SPL has distributed seed balls to all employees.

These seed balls are not just small bundles of potential; they represent the collective effort to nurture and grow a healthier ecosystem. By planting these seed balls and nurturing them under their care, they have participated in a meaningful act of environmental stewardship, making a direct impact on the local biodiversity.

This marks a significant and memorable day at Shriram Properties Ltd as they come together to celebrate their commitment to environmental sustainability and climate consciousness.
